Product Information

Product Name	: Recombinant Human Flt3 ligand (rhFlt3L)
Synonyms	: SL cytokine
Description	: Recombinant human Flt3 ligand (rhFlt3L) produced in <i>E. coli</i> is a non-glycosylated 17.7 kDa protein containing 156 amino acids. Flt3L stimulates proliferation and development of a wide range of hematopoietic cells including hematopoietic stem cells and myeloid and lymphoid progenitor cells, dendritic cells (DCs) and natural killer (NK) cells. The mouse and human Flt3L proteins are 72% identical at the amino acid level with a greater homology in the extracellular region than in the cytoplasmic domain.
